👤 PROFILE

I am a software developer with a background in law and Korean studies. My legal training sharpened my analytical and problem-solving skills, while my cross-cultural expertise enhances adaptability and a global perspective. I bring an interdisciplinary approach to tech, combining precision, innovation, and user-focused design. Passionate about creating impactful tech solutions, I excel in problem-solving and bridging technical and cultural insights.

🎓 EDUCATION

Intensive Fullstack Web Development
Wcoding
07/2024 – 10/2024 | Seoul, South Korea

Master's Degree, Korean studies
Hanyang University. With focus on the geopolitics of the Korean Peninsula, Korean economy and international relations.

📁 PROJECTS

Career-Connect (Group Project)
10/2024 – 11/2024
Collaborated with a team to build Career-Connect, a platform connecting job seekers with employers. Developed and integrated a real-time notification system using Socket.IO ↗ -client to improve user engagement and responsiveness. Actively involved in both front-end and back-end using React and Flask to ensure the uers get notification when a job is listed.

Voting App
CAMASKO
Designed and built an interactive Voting-App where users where able to vote a candidate of their choice using any device of their choice and at the confort of their homes. Utilized HTML, CSS, React,JavaScript for the frontend and Flask, Python and Mysql database for the backend.

Currently Working on a Btech Nexus Website.
Using React, Javascript, CSS, Flask, Python Mysql database and more.
To build an IT startup Company.

⚡ INTERESTS

Web development, game development, legal research & Communication

Geopolitical and Economic Data Analysis:
Passionate about integrating technology to analyze geopolitical trends, with a focus on the Korean Peninsula. Interested in developing tools that can aggregate, analyze, and visualize political and economic data to help stakeholders make informed decisions.

Global and Regional Policy Development:
Enthusiastic about using tech solutions to simulate and model the effects of various policies on global and regional markets, particularly those affecting the Korean economy and international relations.

International Relations and Technology Integration:
Interested in applying full-stack development to create platforms that foster cross-cultural communication, enhance diplomatic engagement, and allow users to explore international relations in an interactive and accessible way.

Tech-Driven Solutions for Geopolitical Challenges:
Exploring how technology can support real-time monitoring and analysis of geopolitical developments, especially within East Asia, and how this data can influence decision-making at both governmental and business levels.
